GB500-2	One ream (500 sheets)	\$110.00
GB500-3	Single sheets	\$0.45

Manuscript Picture Chart Paper — 24" x 36". Heavy white butcher paper.

Top 18" blank, bottom 18" lined ¾" x ¾" x ¾". Solid blue lines.

GB501-1	Two reams (1000 sheets)	\$190.00
GB501-2	One ream (500 sheets)	\$110.00
GB501-3	Single sheets	\$0.45

Manuscript Picture Chart Paper — 12" x 18". Heavy white butcher paper.

Top 9" blank, bottom 9" lined ¾" x ¾" x ¾". Solid blue lines.

GB502-1	Two reams (1000 sheets)	\$110.00
GB502-2	One ream (500 sheets)	\$65.00
GB502-3	Single sheets	\$0.45

Cursive Chart Paper — 24" x 36". Heavy white butcher paper.

Lined ¾" x ¾" x ¾" x ¾". The top and base lines are blue; the two center lines are red. This chart paper is appropriate for d'Nealian cursive penmanship as well.

GB503-1	Two reams (1000 sheets)	\$195.00
GB503-2	One ream (500 sheets)	\$110.00
GB503-3	Single sheets	\$0.45

GB504	Manuscript Ruled Chart Tablets — 24" x 32" 25 sheets. Spiral bound with 2 hole punched.	\$30.00
-------	--	---------

Solid blue lines with middle dotted line, ½" x ¾" x ¾" x ½"

The middle dotted line is between the two ¾'s inches. (The ½" space is the dead space.)

The Importance of Legible Handwriting

PENMANSHIP/HANDWRITING/COMPOSITION PAPER AND NOTEBOOKS ARE CRITICAL TO A STUDENT'S SUCCESS IN NOT ONLY BECOMING BETTER AT HANDWRITING, BUT ALSO, BECOMING BETTER AT THINKING!

The October 5, 2010 Wall Street Journal article “How Handwriting Trains the Brain,” reports “Recent research illustrates how writing by hand engages the brain in learning. . . Other research highlights the hand’s unique relationship with the brain when it comes to composing thoughts and ideas.”

The November 12, 2007, Newsweek article, “The Writing on the Wall,” emphasizes that “good penmanship is more than just a quaint skill. A new study shows that it’s a key part of learning.”

“Handwriting is important because research shows that when children are taught how to do it, they are also being taught how to learn and how to express themselves. A new study by Vanderbilt University professor Steve Graham finds that a majority of primary-school teachers believe that students with fluent handwriting produced written assignments that were superior in quantity and quality and resulted in higher grades—aside from being easier to read. The College Board recognized this in 2005 when it added a handwritten essay to the SAT—an effort to reverse the de-emphasis on handwriting and composition that may be adversely affecting children’s learning all the way through high school and beyond” (Newsweek 2007).

Berninger et. al. in 1997 wrote “Recent research points to an important new discovery about legible handwriting—students who write legibly actually produce better compositions. In a study of Seattle students, researchers from the University of Washington and the University of Maryland concluded that legible handwriting frees students to focus on words and ideas, instead of letterforms.”

It is the spacing between lines and the difference in manuscript and cursive penmanship lines (accommodating for a “dead space” in writing) that help students achieve legible handwriting.

A *USA Today* story echoed the findings of research on the importance of legibility, particularly for students taking the new round of state proficiency tests. According to the Boston College’s Center for the Study of Testing, 45 states have proficiency tests in place, and the majority of those tests include an essay. “Last year an estimated 10 million students nationwide were asked to write responses longhand on state-required tests.” (Temple, 1999.)

Donald Graves, a highly respected authority on the writing process, notes how legible handwriting enhances the writer’s ability to think: “When the handwriting flows, the writer has better access to his own thoughts and information. This is why writers want to write. This is why handwriting is for writing.” (Graves, 1994.)

Students who are taught to write legibly have an advantage in daily writing, on standardized tests, and in life. Legible handwriting is an important skill—far too important to be left to chance. **Every district, school, and classroom should select (1) the correct, recommended lines for manuscript and cursive handwriting, (2) the appropriate line spacing, and (3) the notebook size for convenience on a student’s desk. All children deserve the benefits that legible handwriting can offer. Materials make a significant difference.**

Dr. Ethna R. Reid (2008), after years of research as Director of the Exemplary Center for Reading Instruction (ECRI), emphasizes the importance of **choice** as teachers provide the materials required for effective writing instruction. **“The excellent choices of notebooks and paper that GBESCO offers educators provide the very best for your students.”**
